Chapter 1 – Overview

File Menu

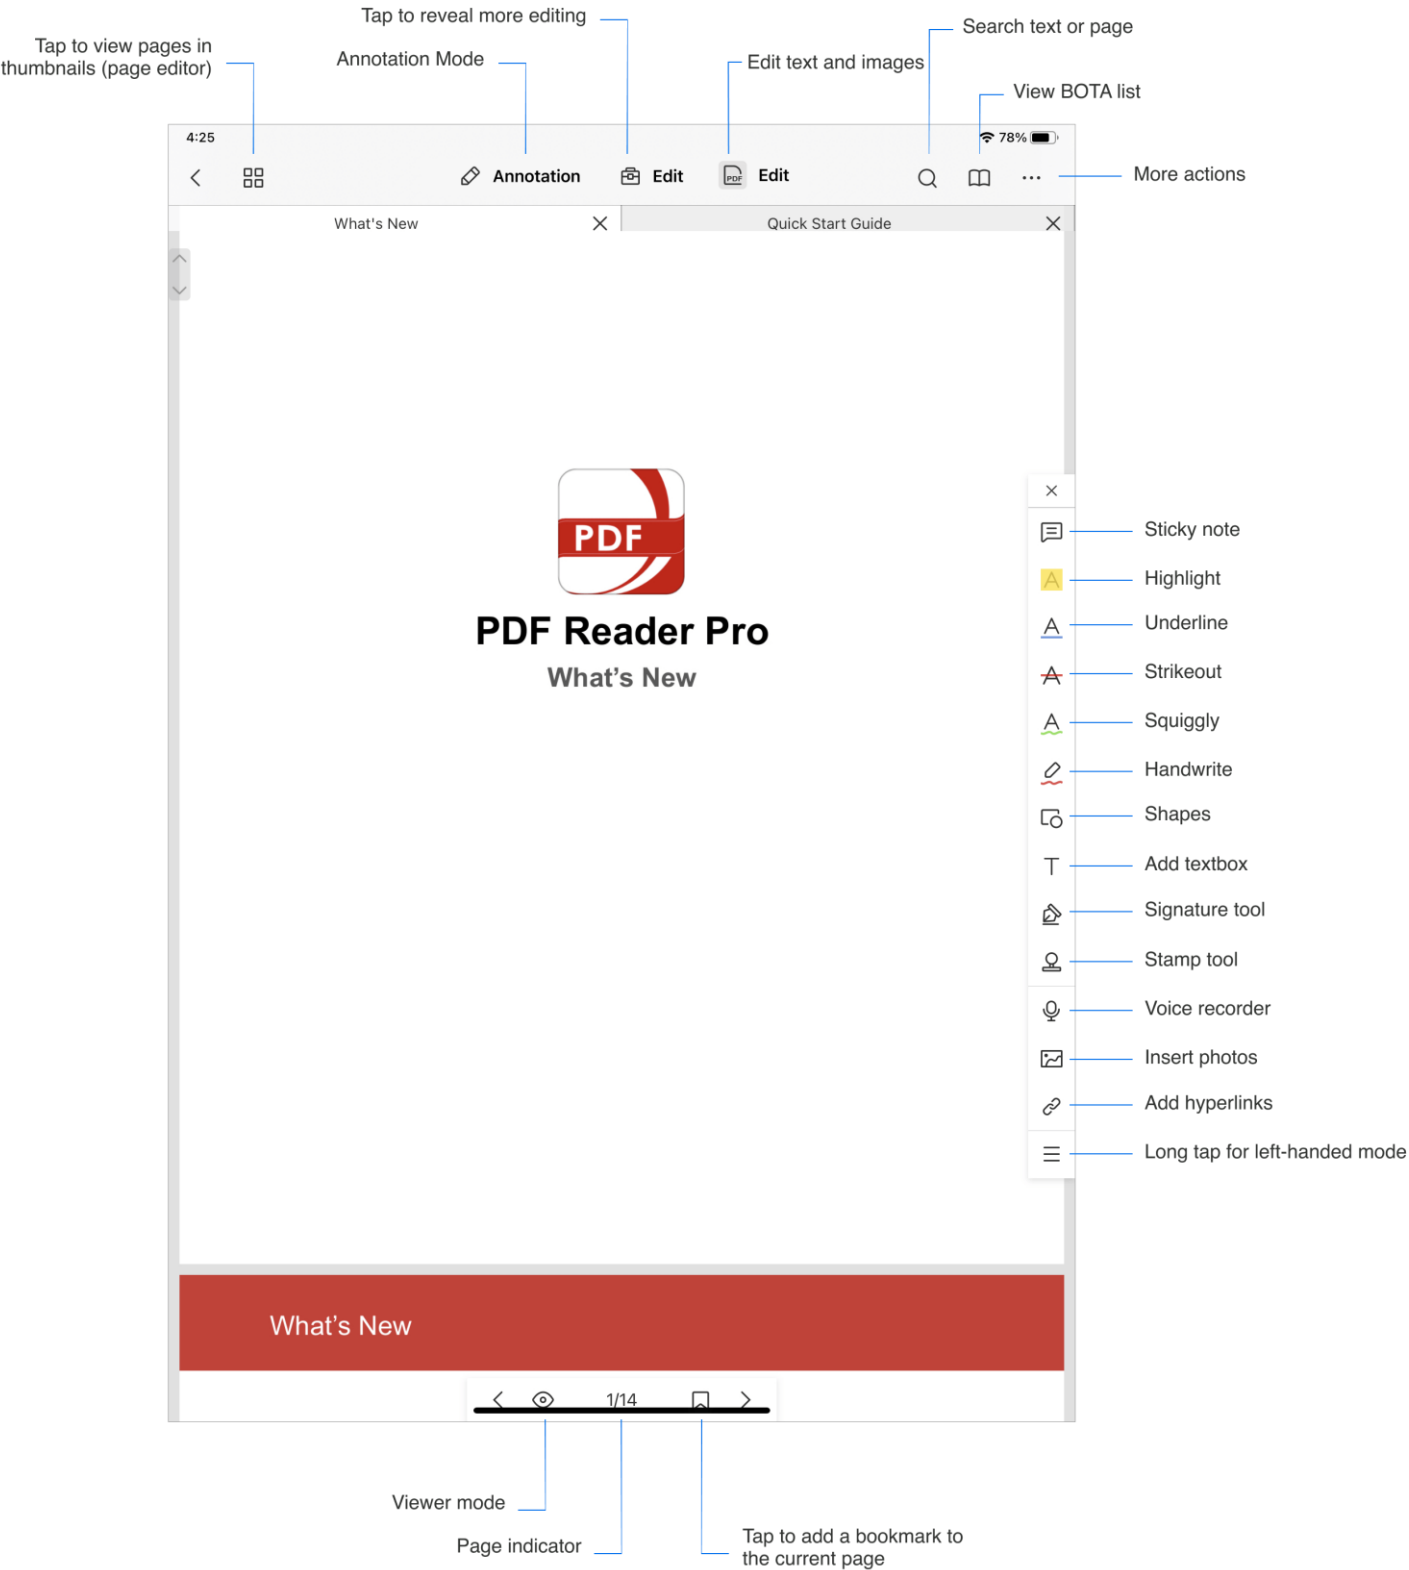

In **Documents** tab, the menu bar provides you with a possibility to manage your files stored in PDF Reader Pro.

Viewer Menu

PDF Reader Pro provides an easy-to-understand way that you can perform all actions while reading PDF documents.

Quick Start Guide

Chapter 2 - Get Files

Transfer Files via Cloud Storage

PDF Reader Pro supports various cloud storage services, including **Dropbox**, **One Drive**, **Google Drive**, **Evernote**, **Box**, **SugarSync**, **FTP**, **WebDAV** and **iCloud Drive**.

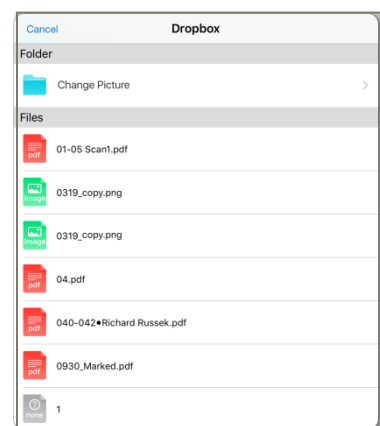

- **Connect to cloud storage services (using Dropbox as an example)**

1. Tap  and then tap **Dropbox**.
2. Log into your Dropbox account and allow PDF Reader Pro to access your account.
3. After authorization, your account will be saved under the “**Accounts**” list. Tap it to view all files stored in Dropbox.

Note: Swipe to the left and tap delete to remove the account from the list.

- **Download files from cloud storage**

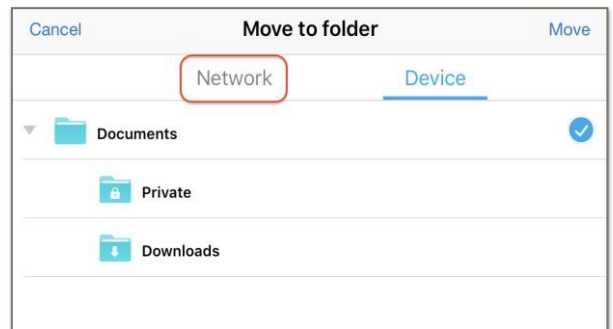

1. Tap on your cloud account.

2. Find the document and tap it to start the download process.
3. The file will be saved in the **Downloads** folder.

- **Upload files to cloud storage**

1. Go to **Documents** tab and tap  at the top right corner.
2. Choose the file(s) and tap **Move** or **Duplicate** on the menu bar.
3. You will see a pop-up window. Then switch to **Network**.

4. Choose the target folder and tap **Paste** to upload the selected file(s).

Note: For iPhone users, select file(s) and tap “Upload”. Then choose target folder to upload the selected file(s).

Transfer Files via iCloud Drive

- **Download files from iCloud Drive**

1. Tap **Import** at the top left corner.
2. Tap **Browse** and tap **select a file** you'd like from iCloud Drive folder or another app.

• Upload files to iCloud Drive

1. Go to **Document** tab and tap  at the top right corner.
2. Choose the file(s) and tap **Move** or **Copy** on the top menu bar.
3. Select a directory in iCloud Drive section.

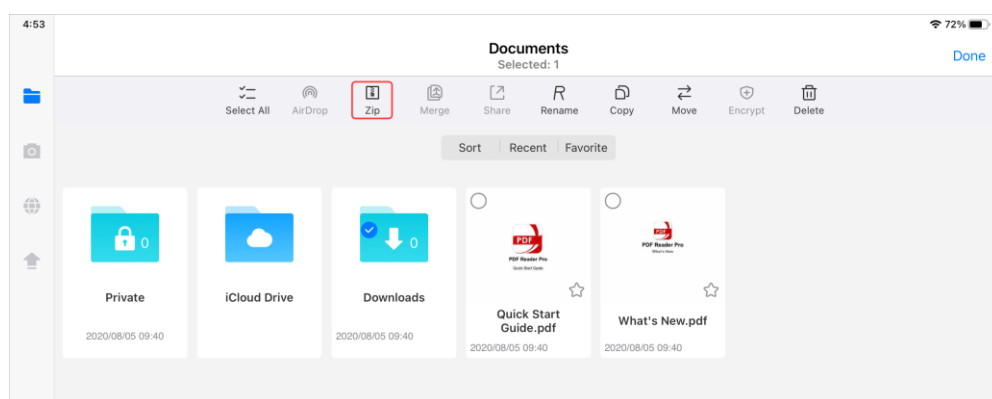

Transfer Files Using iTunes File Sharing

1. Launch **iTunes** on your computer.
2. Connect your iOS device to the computer via USB cable.
3. Select your device and switch to Apps tab.
4. Scroll down to **File Sharing** section and find PDF Reader Pro.
5. Tap the app icon. Drag and drop files between your computer and this app.

Transfer Files via Zip Files

1. In **Documents** tab, tap  at the upper right and select **Zip**.
2. Connect your iOS device to the computer via USB cable.
3. Drag the **Zip** file and move to Mac.

Transfer Files via WiFi Connection

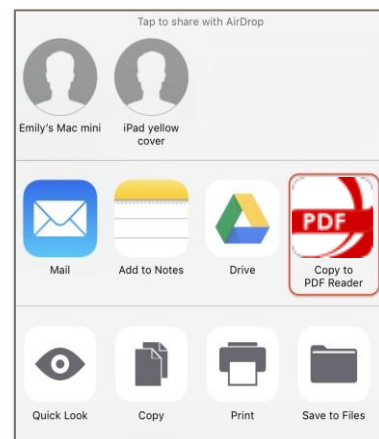

1. Tap  for the **WiFi** transfer mode.
2. Enable the mode and you will get the address.
3. Enter the address on your web browser. You will be able to transfer files to your device wirelessly through the web browser.

Note: Be sure that your device and your PC/Mac are under the same IP address, or you will not be able to connect them.

Open Email Attachments

1. Open the mail in your mail app.
2. Select the attachment you want to edit.
3. Select **Open in Other App**.
4. Select PDF Reader Pro to open in.
5. A copy will be saved to the app.

Note: Locate backups of your iPhone, iPad, and iPod touch:
<https://support.apple.com/en-ae/HT204215#findiTunes>

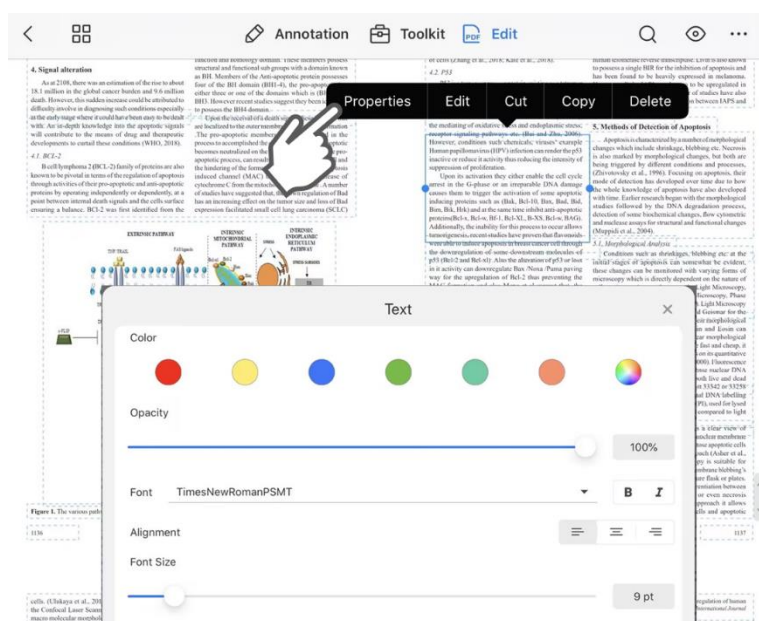

Import Images from Photo Library

1. Tap **+** and tap **Import Images** to import multiple photos from Photo Library.
2. The photo(s) will be saved in the document list.

Chapter 3 - Edit PDFs

Edit PDF Text

1. Open a PDF file and click **Edit** ;
2. Click on a text box and choose from Properties/Edit/Cut/Copy/Delete;
 - **Properties:** Tap Properties to change font color, size, opacity, alignment and font style;
 - **Edit:** Tap Edit to modify the original text, fix typos or other inaccurate content;
 - **Cut:** Tap Cut to remove the selected contents and store them into clipboard;
 - **Copy:** Tap Copy to copy the selected content and paste them to another place;
 - **Delete:** Tap Delete to delete the text box or selected text.

Note: To select the specific text, long press on the text field.

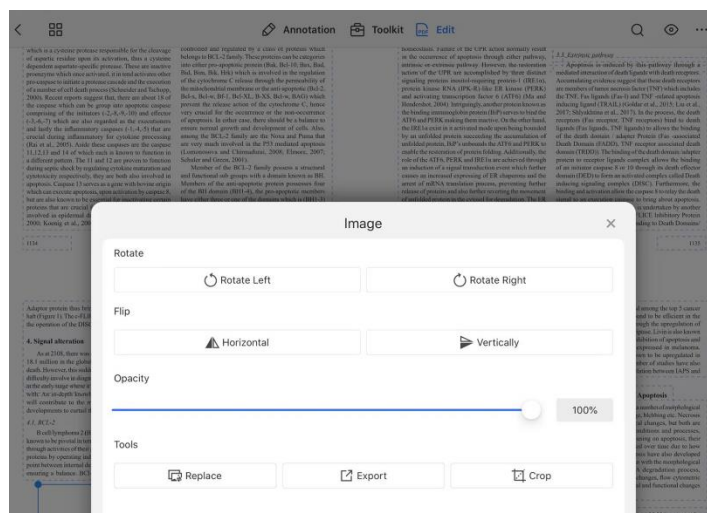

3. If you want to add a new text field, click **Add Text**  at the bottom -> Click where you want to add the text to insert new content.

Note: Tap  to set the font color, size and style for the new text field.

Edit PDF Image

1. Open a PDF file and click **Edit** .
2. Click on an image and choose from Properties/Rotate/Replace/Export/Opacity/Horizontal/Vertical/Crop/Cut/Copy/Delete;

Note: In the Properties panel, you can Rotate and Flip the image, or select editing tools to edit the image, for example: Replace/Crop/Export Image.

3. Or you can drag the corners to adjust the image size;
4. Or you can long-press and drag an image to the desired location;
5. To insert a new image, click **Add Image**  at the bottom -> Click where you want to add an image -> Add an Image from camera or album.

Chapter 4 - Manage Files

Browse Files in Thumbnail List or List View

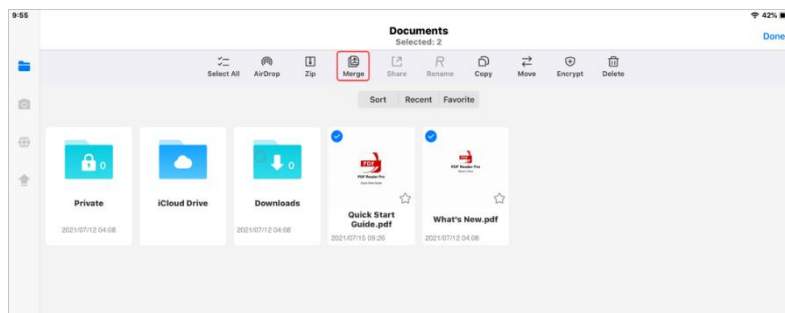

1. In Documents tab, the files display as thumbnails by default.
2. You can switch between **Thumbnail List**  and **List View**  by tapping the icon on the top of the screen.

Toolbar for File Management

1. Tap  at the top right corner to reveal the menu bar.
2. You will see several options for management, including **AirDrop, Zip, Merge, share, Rename, Copy, Move** and more.

Merge PDF Files

1. Tap . Then select 2 or more files and tap **Merge**.
2. You can tap  to change the order.
3. Tap **Merge** to start merging, and the file will be saved in the **Split & Merge** folder.

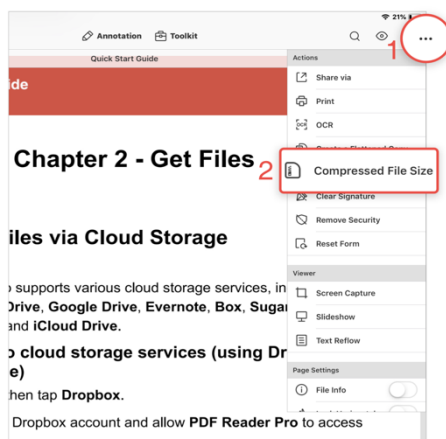

4. Or Click **More Action...** in the reading page, then choose **Merge PDF** -> **Add File**, long Tap on \equiv to reorder files.

Compress PDF

Now PDF Reader Pro supports to reduce your PDF file size and share it via email with ease.

1. Open the file you would like to compress.
2. Tap **More Actions...** at the top right.
3. Select **Compressed File Size** .

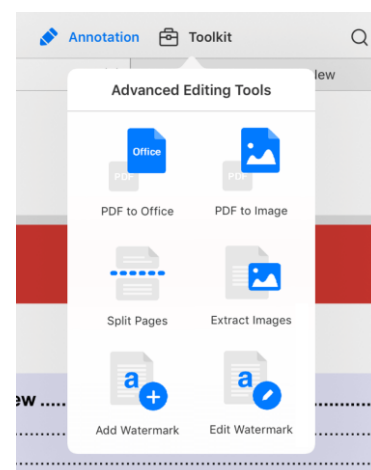

4. Choose the document quality and tap **Start** (Large/Medium/Small/Minimum) File Size.
5. PDF Reader Pro will save a compressed file in Documents folder automatically.

Toolkit for File Editing

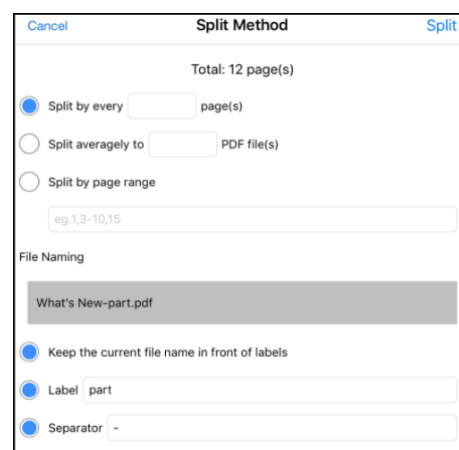

Open a PDF file and tap toolkit .

It will reveal more advanced editing tools to convert **PDF to Office** (Word/Excel/PPT/RTF/HTML/Text/CSV) files, **PDF to Image** (PNG/JPEG/GIF/TIFF/TGA/BMP/JP2) files, **Split Pages**, **Extract Images**, **Add Watermark** and **Edit Watermark**.

Spilt Pages

Open a PDF file and click the toolkit , tap **Split Pages**. Then you can set how to split the pages.

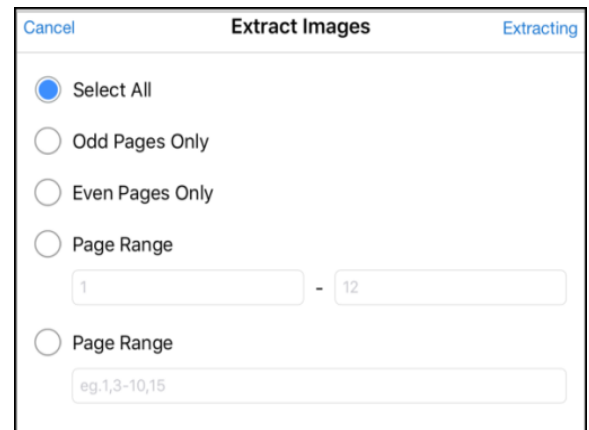

Extract Images

Open a PDF file and click the toolkit , tap **Extract Images**.

Then you can set how to extract images from the file.

In **Thumbnail View**, PDF Reader Pro supports to arrange and manage documents with drag and drop.

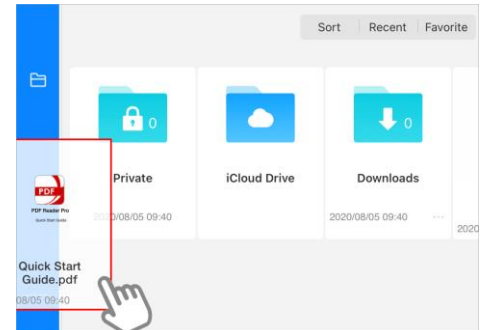

Drag to Create a New Folder

1. Long tap on the file you'd like to move.
2. Drag the selected file over the target file.
3. The file will be highlighted with grey. Then drop the file to create a new folder.

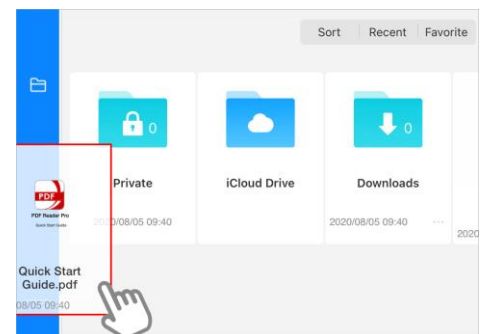

Drag and Move Files

1. Long tap on the file or folder.
2. Drag the selected item to **Folder** appeared on the upper left corner.
3. Drop the item to move it to the target folder, **iCloud Drive**, or **Network** storage.

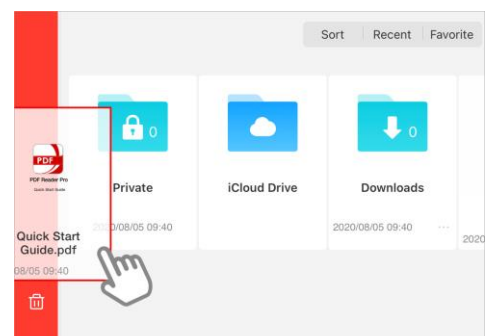

Drag and Move Files

4. Long tap on the file or folder.
5. Drag the selected item to **Folder** appeared on the upper left corner.
6. Drop the item to move it to the target folder, **iCloud Drive**, or **Network** storage.

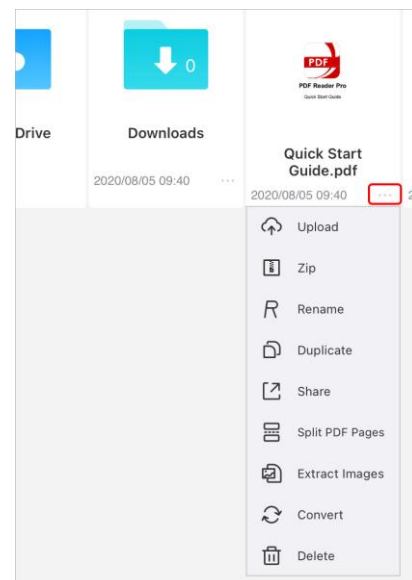

Drag to Delete Files

1. Long tap on the file or folder.
2. Drag the selected item to **Delete** appeared on the bottom left corner

Quick Actions - Thumbnail View

1. Tap on the specific file and then tap on the **More** button below each file.
2. You will see a menu of quick actions, including **Upload, Zip, Rename, Duplicate, Share, Split PDF Pages, Extract Images, Convert** and **Delete**.

Quick Actions - List View

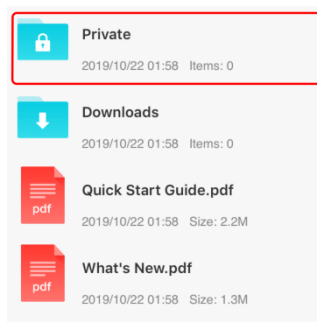

1. While viewing files in **List View**, tap on the specific file and swipe to left.
2. The quick actions include **AirDrop, Zip, Merge, Share, Rename, Copy, Move, Encrypt**, and **Delete**.

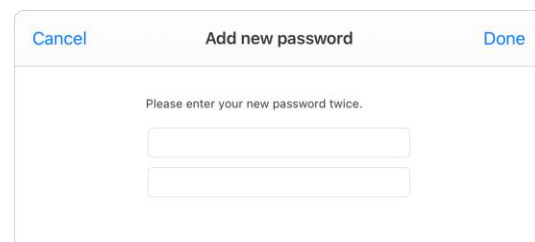

Private Folder

• Set Your Password

1. Go to Settings tab  and enable **Show PrivateFolder**.

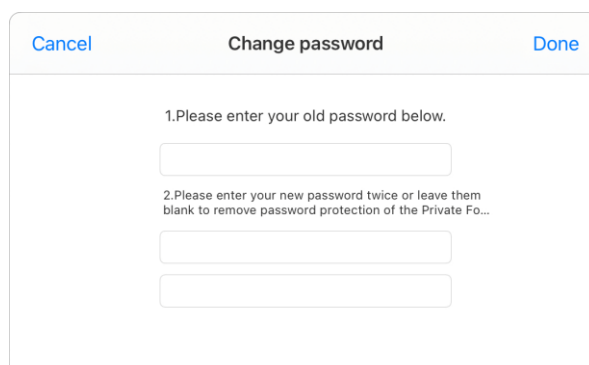

2. Back to **Documents** and tap  at the top right corner.
3. Tap on Private folder and then set up your password.

A screenshot of a 'Add new password' dialog box. It has a title bar with 'Cancel' on the left and 'Done' on the right. The main text says 'Please enter your new password twice.' Below this text are two empty rectangular input fields stacked vertically.

• Change Your Password

1. Tap  and tap on the Private folder again to change the password.
2. If you'd like to remove the password protection, simply keep the new password field in blank.

A screenshot of a 'Change password' dialog box. It has a title bar with 'Cancel' on the left and 'Done' on the right. The main text says '1.Please enter your old password below.' followed by a single input field. Below this, it says '2.Please enter your new password twice or leave them blank to remove password protection of the Private Fo...' followed by two stacked input fields.

- **Encrypt PDFs**

1. In **Documents** tab, tap  at the upper right.
2. Select the PDF you'd like to keep it a private file.
3. Select **Encrypt**  ; then enter and confirm the password and remember it!
